

Celergy Partners with Ruckus for Small / Midsize Wireless Market Solutions

Carlsbad, CA, April 16, 2008 --(PR.com)-- Celergy Networks, a leader in wired and [wireless networks installation](#), announced today a strategic partnership with Ruckus Wireless, a next-generation Wi-Fi company focused on solutions to small and midsize enterprises.

Under this partnership Celergy will become a preferred installer for customers in the US and Canada. The two companies will also coordinate business development initiatives to maximize market penetration.

“We are a vendor agnostic installation company, constantly researching the latest technologies in order to offer reliable and cost effective solutions to our clients” said Mark Modricker, Celergy's Vice President of Sales. “Ruckus Wireless offers the latest Zone Flex technology, which stands out as a great solution for our small to midsize clients, with industrial-strength wireless systems at a price our midsize customers can afford. Our companies are a good fit as we are both leaders in our respective markets therefore providing end-to-end integrated solutions to our clients.”

“We are very excited to bring Celergy on board as a part of our Big Dog partner program” said Ron Gill, Director of Sales for North America at Ruckus Wireless. We see their expertise in planning and deployment as an asset to our target market, where IT resources may be minimal and wireless is often misunderstood as too complex or expensive to implement. That's where Ruckus, and a wireless expert like Celergy, make a difference. We're looking forward to a great partnership.”

About Celergy Networks, Inc.

Founded in 1989, Celergy Networks, Inc. is a single-source provider of wired /fiber networks and [wireless installation](#) to support voice, data, and video network infrastructure. From the desktop to the DMARC - Celergy Networks has served as a one-stop solution to Fortune 1000 as well as government clients nationwide. Celergy Networks is privately held and headquartered in Carlsbad, California. For more information, visit <http://www.celergy.com>.

About Ruckus Wireless, Inc.

Based in Sunnyvale, California, Ruckus Wireless was formed in 2004. The company designs, develops and markets industrial-strength Wi-Fi systems that provide reliable distribution of delay-sensitive multimedia content and services over standard 802.11 technology. Its flagship product, ZoneFlex, is the first wireless LAN system to combine wireless LAN principles with state-of-the-art Wi-Fi advances, such as smart antenna arrays and wireless meshing, to create Smart Wi-Fi. The company's patented technologies deliver predictable performance, extended range and real-time adaptability to changing Wi-Fi environments. The company is led by President and CEO Selina Lo.
