

Foreclosure Abstracts LLC Expands Its Coverage to Include San Diego Foreclosures

San Diego foreclosure data geared specifically for real estate professionals.

San Diego, CA, April 26, 2008 --(PR.com)-- [San Diego foreclosures](#) continue to soar, but the availability of quality foreclosure listings is limited. Foreclosure Abstracts LLC (www.foreclosure-access.com) has expanded its foreclosure listing service to San Diego County. With 1731 number of notice of defaults and 2940 number of notice of trustees sales recorded each month in San Diego, there are many opportunities for real estate professionals to market their services.

Although there are a number of national and local data providers, many of them are merely interested in selling their so-called educational materials. Once you provide them with your contact information, you will be bombarded with phone calls soliciting you for their thousand dollar educational programs.

Foreclosure Abstracts does not sell any educational material. Their product is geared toward real estate professionals, not novice investors. Their clients include real estate brokers, attorneys, and mortgage bankers.

The [San Diego foreclosure](#) listings are provided each day via email to clients. The listings include homeowner contact information including mailing address and phone number, and are perfect for real estate professionals to integrate into their marketing campaigns.

Foreclosure Abstracts LLC collects and distributes foreclosure and pre foreclosure data in various counties around the nation. For more information about Foreclosure Abstracts please visit www.foreclosureabstracts.com.
