

Stainsafe Announces New GreenGard Furniture Protection System

Stainsafe's commitment to keeping your furniture looking great continues with its development of the GreenGard furniture protection system.

Palm Beach Gardens, FL, April 29, 2008 --(PR.com)-- Stainsafe, one of the largest furniture protection companies has announced the release of their new GreenGard furniture protection system. GreenGard is an excellent product for anyone who wishes to maintain the integrity of valuable furniture while being responsible about the health of the planet. The GreenGard System is an eco-friendly line of furniture care and furniture protection products, one of the first of its kind in the furniture industry.

As more Americans become concerned about the state of the environment, it is only sensible that products like GreenGard will soon become the standard across all industries. Stainsafe's ability to recognize the shift in American consumers' concern about the health of the environment clearly demonstrates its position as a company in touch with its customers' wants and needs. GreenGard brings peace of mind about the future of your furniture as well as the future of our planet.

GreenGard is a conscientious effort by Stainsafe to carry a product that is better for the environment, family and furniture. GreenGard Eco-Wise products are all water-based, non-carcinogenic, ozone friendly, phosphate-free, and contain no hazardous air pollutants. GreenGard's packaging is made from recycled materials, the bottles it comes in are recyclable, and the application sponges are made of soy, a renewable resource. The people behind GreenGard are so committed to keeping every aspect of the product eco-wise that even the point of sale materials are printed on locally sourced sugar cane paper.

GreenGard products are not only exceptional when it comes to cleaning and protection furniture. Stainsafe offers GreenGard as a warranted product through furniture retailers. In conjunction with purchasing and Eco-Wise package of furniture cleaning products, the GreenGard warranty, with the help of professional furniture repair technicians, will help consumers repair accidentally damaged furniture that is covered under the terms of the warranty.

In addition to warranted products, Stainsafe also offers a non-warranted GreenGard line. The line offers the same great GreenGard products but without a warranty. Stainsafe plans on offering non-warranted GreenGard products on their website by the end of 2008.

Furniture is something we want to preserve, and the Earth is something we have to. Stainsafe's GreenGard products make it possible to help in both cases.

About Stainsafe - Stainsafe is one of the largest and most experienced furniture protection companies in the industry. In operation for more than 22 years, Stainsafe offers protections plans and products to prolong the life of your furniture.
