

Mobile Content: Translation Service Opens Up New World of Customers

Norcross, GA, May 14, 2008 --(PR.com)-- One of the Online Industry's premier translation services, PCITranslations.com, is proud to announce the official launch of Mobile-Translations.com.

“The increased demand for translations of mobile- and wireless application based content prompted us to develop a special process that allows us to deliver customized, accurate translations of content in over 20 languages, and to do so in a very short period of time,” President of Mobile-Translations.com [Moreno Aguiari](#) stated.

Mr Aguiari continued: “We initially offered mobile content translations to a limited amount of clients, but because of their positive feedback and the growing amount of demand we decided to open this service to all clients, large and small.”

By working closely with its [clients](#) and understanding their individual needs, Mobile-Translations.com is specialized in offering solutions for the unique demands of mobile content applications, such as limited text space and keystroke limitations.

Mobile-Translations.com offers accurate and timely translations to and from languages such as German, Chinese, Spanish, Japanese, French, Korean, Greek, Polish, Dutch, Croatian, Portuguese, Russian, Turkish, Hindi, Italian, and many more.

For more information, free quotes, and to learn more about the growing international mobile markets, interested parties are encouraged to visit the Mobile-Translations.com web site.
