

Get a Natural High® with the New Aroma Oxygen Vending Machine

Las Vegas, NV, May 26, 2008 --(PR.com)-- You've seen Oxygen Bars in Las Vegas, California, and Florida. Now there is a new way to breathe your way to Nirvana, the Aroma O2™ Aroma-Oxygen Vending unit is now available at www.o2planet.com

The oxygen vending locations are provided for you (for a fee) or place them yourself. This in-demand machine is perfect for health clubs, night clubs, pharmacies, health food stores, airports, Salons and spas, ski resorts, truck stops, coffee shops, and retail areas with good foot traffic.

The sessions sell for \$5 for 10 minutes. (One machine can generate \$30 per hour, \$240 per 8 hour day, \$87,600 per year.) The session price compares favorably with a Starbucks® cup of coffee with no jitters or stomach distress, just a long lasting Natural High® that lasts for hours.

This in-demand machine makes the oxygen enriched air from the atmosphere so there is no stocking or refills needed. The Aroma O2™ purifies it, and puts out a safe level of oxygen enriched air (30%) that energizes and relaxes at the same time. A unique Aroma Headset allows the user to choose one of various “flavors” including Peppermint, eucalyptus, lavender, orange, even coffee or chocolate which enhances the experience by adding the benefits of Aromatherapy.

Here are the Documented benefits of Oxygen

Here are the documented effects of usage of supplemental oxygen:

- Recovery from physical activity increases by 5-10 fold
- Physical activity participation at a higher level
- Excellent relief from altitude sickness and symptoms
- Relief from stress (Stress causes shallow breathing which in effect limits oxygen consumption)
- An increase feeling in well-being
- More efficient metabolism
- Sleeping better
- Enhanced moods

Here are the documented affects of lack of oxygen at the cellular level:

- Development of cancerous cells which typically convert to cancer
- The development of disease more rapidly and more often
- Retention of toxins in the tissues
- Lack of tissue stimulation furthest from the heart
- Fatigue more often and for longer periods
- Weak mental focus and stimulation
- Poor digestion and food metabolism
