

Dr. Jeannette Graf's Book Stop Aging, Start Living Headed to Vietnam for the Miss Universe 2008 Pageant Gift Bag

Dermatologist and scientist, Dr. Jeannette Graf wants to make sure that the Miss Universe contestants have her science-based advice to staying young and beautiful. In her book, "Stop Aging, Start Living" Dr. Graf details her easy-to-follow four-point plan to lowering the body's acidity (pH), which has helped thousands reclaim (and maintain) their vitality, radiance and youthful appearance.

New York, NY, June 28, 2008 --(PR.com)-- Although all the Miss Universe 2008 contestants are young and gorgeous, it is never too early to begin a routine that beautifies your body on both the inside and out. Dr. Jeannette Graf, a leading dermatologist and former NIH researcher, has found through extensive studies that optimal skin health requires an internal acid/alkaline balance. Her breakthrough book, Stop Aging, Start Living outlines her finds and explains how you can improve your skin from the inside out in just four easy steps: Nutrition, Supplements, Lifestyle and Skincare.

Following up on her successful participation in WOW! Creation's Miss America gift bag and gifting lounge, Dr. Graf will be sharing her innovative program with the contestants at the Miss Universe 2008 Pageant. Stop Aging, Start Living will be featured in the official VIP gift bag for contestants and judges created by WOW! Creations. Dr. Graf is doing her part to keep the universe beautiful.

The pageant will be held in Nha Trang City, Khang Hoa, Vietnam on July 13. This is the first time an event of this kind has been held in Vietnam. Miss Universe 2008 will be broadcast live on NBC at 9PM ET.
