

SEO Marketing Adds Google Checkout Payment Option for Search Engine Optimization Services.

SEO clients can now make their service payments securely online due to the recent addition of Google Checkout services.

Atlanta, GA, July 03, 2008 --(PR.com)-- SEO Marketing LLC added a new innovative way to make it easier to pay for their [seo services](#). The company believes they have found a great new tool to make things easier for seo clients. Clients can make their on-line payments securely through the use of Google Checkout.

Their management feels that most consumers and businesses feel confident in using most any Google product. The new checkout process is safe, secure and easy to use.

“The fact that Google has great name recognition and the Google badge is easily recognized creates a comfort with checkout services. We feel it will benefit both parties and most online customers get frustrated with lengthy payment processing procedures. We hope Google Checkout relieves that frustration by storing the purchasing information making future payments easier. The response that we have received from our customers has been nothing but positive. Clients seem to like our different payment options”, said Kris K.

The company says it will continue to offer Pay Pal and the US Postal Service as options to its customers. The addition of Google Checkout should be one more additional resource not only the client, but for the company as well.
