

## **Aquascape Environmental Awarded Barrington Farms Stream Restoration Project**

Atlanta, GA, July 08, 2008 --(PR.com)-- A stream restoration project in the Barrington Farms subdivision in Roswell, Ga. will be designed and constructed by [Aquascape Environmental](#), a turn-key aquatic resource services firm based in Woodstock, Ga.

Aquascape Environmental was awarded the Barrington Farms Stream Restoration Project by the City of Roswell. The project scope includes development of plans and implementation of the construction phase for a stretch of unnamed creek that drains through Barrington Farms Subdivision and into Big Creek Park.

“The project objectives are to improve stream and bank stability, restore stream hydrology, protect water quality and diversify natural habitat,” said Paul Slovisky, Vice President of Operations for Aquascape Environmental.

“When the project is completed, Barrington Farms residents will be able to see and enjoy the results,” Slovisky added.

The projected completion date for the Barrington Farms Stream Restoration Project is Spring of 2009.

Aquascape Environmental was founded in 1990 as a turn-key firm providing professional aquatic resource management services. The firm offers a variety of management, consulting and contracting services for lakes, streams, and wetlands, and serves the entire Southeastern region.
