

The Center for Alternative Medicine is the Home of One of Phoenix's Top Doctors

Dr. Micheal Leff has been recently recognized as one of Phoenix's Top Doctors of 2008. The Center for Alternative Medicine is excited to welcome new patients who are seeking an alternative to traditional means of medicine.

Scottsdale, AZ, August 06, 2008 --(PR.com)-- The Center for Alternative Medicine specializes in Acupuncture, Kinesiology and Nutrition. Whether you're fighting disease, pain or injury, or helping to prevent illness, the Center for Alternative Medicine can help. Dr. Leff has created an outstanding environment where people can experience a healthier way of life in one complete location.

Acupuncture is a painless, tremendously effective procedure. By using the energy in our own body, precise acupuncture can redirect our energy to areas of the body that are affected by disease or dysfunction, and positively influence our discomfort. Acupuncture has been known to have an incredible effect on conditions including, but not limited to, allergies, asthma, addiction, intestinal and hormonal problems, migraines, stress, and infertility. The possibilities of acupuncture are endless.

Kinesiology, the study of muscles, is an important part to a healthier life. Every muscle, organ, and gland in our bodies require certain nutrients in order to function at maximum capacity. As a new client, an evaluation would be done which will help to determine what nutritional deficiencies may be present and what can be done to fix them.

Chiropractic focuses on the skeletal and nervous systems. Chiropractic adjustments are the safest and most effective method of eliminating neck and back pain, disc problems, sciatica, headaches etc...

The Center for Alternative Medicine is dedicated to providing new possibilities in dealing with the vast array of health issues confronting people today. Dr. Leff is committed to looking at each person as a whole, and finding the root of each problem and creating a better quality of life.
