Panacea Announces Live Diagnostic and Interventional Radiology Workshop to be Held October 3, 2019

Panacea hosting live one-day workshop on diagnostic and interventional radiology coding and documentation at its St. Paul headquarters on Thursday, October 3.

St. Paul, MN, August 29, 2019 --(PR.com)-- Panacea, a Career Step company and leading provider of mid-revenue cycle management, innovative software and enterprise-level educational solutions, is proud to announce a one-day event, Diagnostic and Interventional Radiology Workshop: Unraveling the Coding and Documentation Quagmire, that will feature Panacea’s expert team with actionable information on correct and compliant code assignment for radiological procedures. The event will be held at Panacea’s headquarters in St. Paul, MN., on October 3 from 8:00 am to 4:30 pm.

“Radiology coding and documentation is particularly complex and complicated, and we see practices and health systems nationwide struggle with it when we conduct audits and education,” said Jeff Majchrzak, Panacea Vice President of Radiology and Cardiology Consulting Services and scheduled workshop speaker. “During this workshop, we will focus on providing best practices, addressing hot-button issues and offering insight into emerging trends in diagnostic and interventional radiology coding and documentation to help those focused on both technical and professional coding and billing.”

The workshop will feature Mr. Majchrzak as well as Donna Richmond and Cathy Huyghe, who are both senior healthcare consultants with Panacea with extensive experience in the radiology and interventional radiology coding. They will each offer insights applicable for anyone working on the coding and billing of diagnostic and interventional radiology procedures, which may include technologists; health information management staff; compliance, billing, revenue cycle, and chargemaster team members as well as the physicians generating the actual dictated reports to validate the charges submitted.

Workshop attendees will gain valuable insights on correct and compliant code assignment for interventional radiology and non-invasive radiology procedures by reviewing real-life dictated report examples to illustrate the coding and billing do’s and don’ts. There will also be time for a live Q&A with the Panacea team of experts.

This one-day live workshop is being sponsored by Bracco Diagnostics, Inc. For more information and to register for the event, visit https://www.panaceainc.com/panacea-workshop-2/.
